## ACTIVITY 1

Describing a function

## Match the words with their meaning.

| 1. Minimum | a. The points where the function <br> intersects an axis. |
| :--- | :--- |
| 2. Maximum | b. The steepness of a line or the rate of <br> change of a linear relationship. |
| 3. Slope | c. The set of input values of the variable $x$. |
| 4. Intercepts (with the $x$ or $y$ axis) | d. As you move across the graph from <br> left to right, the graph goes up. |
| 5. Domain | e. As you move across the graph from <br> left to right, the function goes down <br> and then goes up. |
| 6. $f(x)$ is increasing over an interval | f. As you move across the graph from <br> left to right, the function goes up and <br> then goes down. |
| 7. Range | g. As you move across the graph from <br> left to right, the graph goes down. |
| 8. $f(x)$ is decreasing over an interval | h. The set of all outputs or $y$-values for a <br> function. |
